Impure Bi-Carb Soda is of a slightly dirty white color. It may appear white, examined by itself, but a COMPARISON WITH CHURCH & CO.3 "ARM AND HAMMER" BRAND WILL show, the difference.

See that your Paking Soda is white and PURE, asshould be ALL SIMILAR SUBSTANCES used for food

A simple but severe test of the comparative value of different brands of Soda is to dissolve a dessert spoonful of each kind with about a pint of water (hot preferred) in clear glasses, stirring until all is thoroughly dissolved. The deleterious in-cluble matter in the inferior Soda will be shown after settling some twenty minutes or sooner, by the milky appearance of the solution and the quantity of floating flocky matter activing to quality.

Be sure and set for Church & Code Solution

Be sure and ask for Church & Co.'s Sola and see that their name is on the package and you will get the purest and whitest made. The use of this with sour milk, in preference to Baking Powder, saves twenty times its cost. See one pound package for valuable informa-tion and read carefully.
